

## Lincoln Conservation Commission Town Report for 2014

The Lincoln Conservation Commission was not active during 2014. At this time there is no regular meeting time. However, all members agree that it is important to have the Commission available so that we are able to convene if/when town conservation issues arise.

If anyone is interested in a relevant project, please contact Tina Scharf. Some potential activities would be: New Haven River water quality monitoring, flood control, and/or bank stabilization, alternatives to road salt (e.g., beet juice), and wildlife habitat enhancement on the Town Forests.

At this time the Commission has \$503.67 in its coffers. This money would be available for a conservation-related project. Again, if you have ideas and energy to put into a project, please contact Tina Scharf.

Respectfully submitted,

Ilana Brett

Ed Clark
